Work Experience

Dec 2023 - Present

Web Developer

Bee Data Technologies

As a web developer at Beedata Technologies, I specialize in creating impactful projects that streamline operations. My work includes developing an employee management system for efficient team oversight, designing Pole Creation tool for crafting technical questions, and overseeing the maintenance of our website, beedatatech.com, along with managing our databases. My role is dedicated to enhancing productivity and facilitating smooth workflow within the company.

Internship

6 Months

Jobby Application, IPL Dashboard, Todo List Application and more

NxtWave CCBP Learning Platform

In NxtWave CCBP learning platform, where I earned certifications in Python, HTML, CSS, JavaScript, and MERN stack technologies. My training included hands-on experience through projects such as the Jobby Application, an IPL Dashboard, and a Todo List Application, among others. These projects allowed me to apply my skills in real-world scenarios, enhancing my coding and problem-solving abilities. This comprehensive learning experience has equipped me with a robust foundation in full-stack development.

Projects

2 Months

Employee Management System

I crafted an Employment Management System at Beedata Technologies to streamline HR operations. It tracks interview, onboarding, and working statuses while offering features like performance evaluations. Security measures, including robust login authentication, protect sensitive employee data. This user-friendly system enhances efficiency, enabling our team to focus on strategic growth initiatives.

1 Months

Poll Creation

This poll creation web application facilitates users in crafting and sharing polls effortlessly. Users create polls with customizable questions, options, and duration. Participants engage by voting on polls, with results displayed visually. The platform ensures secure authentication, data privacy, and moderation features. Continuous monitoring and updates maintain performance, security, and user satisfaction.

Certification

- Programming Fundamentals With Python
- Build Your Own Static Website (HTML, CSS, Bootstrap)
- Build Your Own Dynamic Website (JavaScript, HTML, CSS, Bootstrap)

PERSONAL ATTRIBUTES

Strengths

Quick learner, dedicated to continuous self-improvement in programming and technology.

Self-confident, with strong problemsolving abilities and a passion for software development.

Enjoys reading during leisure time and committed to personal growth and development
